COLOR® EXPERT

There's a pro in everyone.

Our philosophy

„There is a PRO in everyone!"

End user orientation

COLOR EXPERT knows the needs of the end user in terms of painting tools - and develops products, based on these needs. Our end-user studies show: They expect a high-quality result; It is important that the products are attractive and harmless for both humans and nature. They expect to be quickly informed at the POS system and guided to the right product. We consistently orient ourselves towards these requirements of end users - with our products and presentations.

Product innovations

We constantly developing our painting tools. The decisive factor is: to provide a work result like a professional. We are in permanent discussions with professional painters and the paint industry. Our products are always tailored to the current status of paints and applications. We also attach great importance to modern and ergonomic design and high-quality materials during our product developments.

Sustainability

We use consistent tested materials for production of our painting tools. They provide the base for high quality and guarantee contaminant-free, harmless products, which meet all legal and customer-specific requirements. From handles to paint grids or roller covers, we pay attention to sustainable production. We manufacture our brush handles from FSC®-certified woods, as part of our responsibility for nature and consumer.

Manufacturing competence

With our own production facilities and more than 125 years of experience, we present the highest level of competence in the development and manufacture of painting tools. Our paint roller production is the largest in Europe. All our production processes are subject to strict quality controls and continuous improvement processes. This is how we guarantee consistently a high level of quality.

Efficiency

Painting tools - like a professional

During development of our products and conception of our assortments, we consistently focus on the needs of our customers - our partners in retail as well as the end-users. We are in close contact with the paint industry, our raw material suppliers – e.g., filament manufacturers - and professional painters. Latest findings from the paint industry as well as the experiences of professional users flow directly into our product development. Therefore, the end users work with our painting tools like from the professional.

Own production facilities

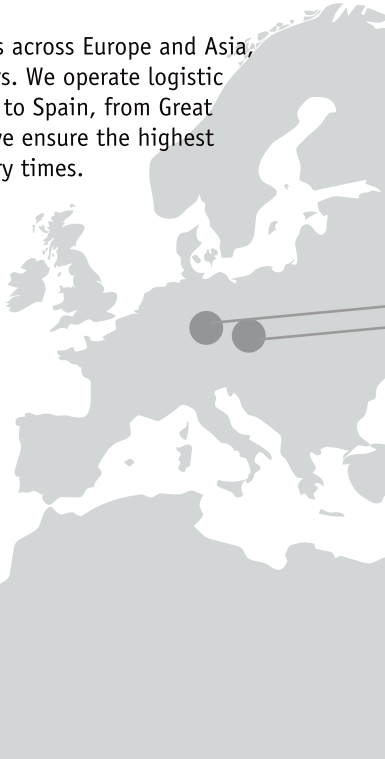

We produce in our own production facilities. Our paint roller production in Pelhimov (CZ) is the largest in Europe. The automatic production systems are state-of-the-art and enable us to produce efficiently.

State-of-the-art production processes

We manufacture paint rollers for all requirements and applications with the most modern production methods. Our extrusion machines produce 12.75 million meters of inner tubes for rollers every year. Our brush manufacturing line ensures maximum efficiency. Also, the plastic components and plastic products are produced fully in our multi-component full automatized plastic injection molding machines. Permanent quality controls guarantee a constant high level of quality.

Reliable delivery times

With our logistic and sales locations across Europe and Asia, we are always close to our customers. We operate logistic centers all over Europe: from Latvia to Spain, from Great Britain to Uzbekistan. In this way we ensure the highest quality of supplies and short delivery times.

Storch-Ciret Group in numbers

Employees	approx. 1.400

Unique display concept

Intuitive consumer guidance. Safe decision.

Optimal customer guidance = satisfied customers. Tests showed: safely guided consumers buy up to 15% more, and higher quality products. COLOR EXPERT ensures that the end customers can easily orientate themselves in the store and can make their decisions quickly. The POS concept guides everybody easily from the pre-defined application fields through the specific applications to the right product.

Quick orientation. Optimal presentation.

Safe guidance of end user is continued in product design and on the packaging. Easily understandable pictograms and modern icons provide intuitive information about possible applications and product features. The end users will quickly find exactly what they need to achieve perfect work results.

Less costs. High profitability.

Our intuitive customer guidance and POS information materials relieves the sales force. The customers find the right product on the shelf themselves. Your work force needs = costs are reduced - and customer satisfaction is increased at the same time.

The colour coding system from COLOR EXPERT

The color coding system from COLOR EXPERT assigns clearly defined colors to different working areas. The colors are based on our natural, familiar color spectrum: purple, blue, green, yellow and red. The respective area of application is properly identified and signed by color coding. Application pictograms in corresponding colors support the structuring of different application areas in respective working steps.

The function of the POS elements

There is a pro in everyone.

The closer the end user gets to the product, the greater knowledge he obtains. The targeted placement of related items strengthen cross-selling effects.

Head displays

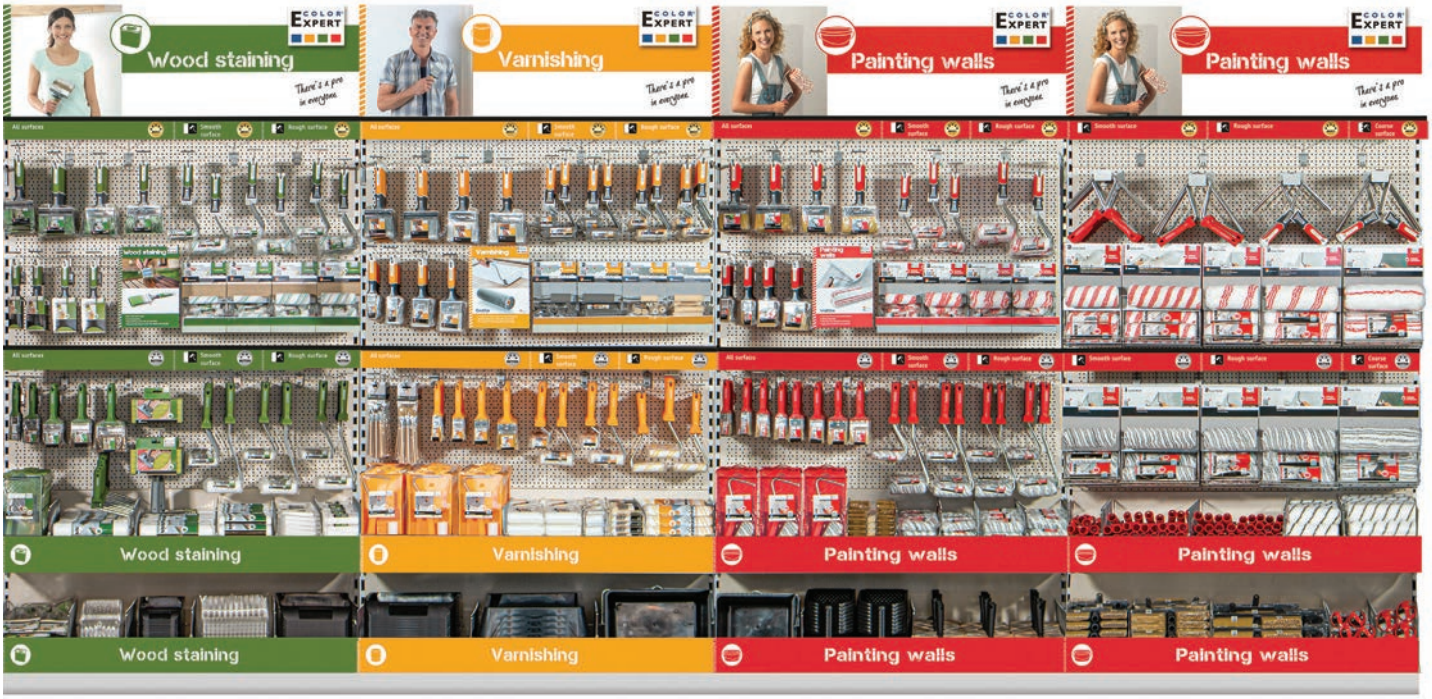

The colour, text and key visuals on head displays identify the respective product area.

Vertical banner

Colour-coded vertical banners lead end users to respective application field even in narrow aisles. They also draw attention to high-quality products. This improves the overall result - for end user and retailer.

Horizontal banner

Horizontal banners structure the assortment of the respective working steps. The products are divided into reasonable product segments. In this way, you safely guide the end customers to the right segment.

Safe to make a purchase decision

With COLOR EXPERT, the end user is safely guided on his way to right purchase decisions - and fully supported on his project with appropriate painting tools.

1. The range

- Thanks to vertical banners, the application field is clearly visible from faraway distance, even in narrow aisles.
- The clear assignment of paints and application field clearly shows to the end customer: here I am right.
- Head displays confirm the application fields on each module.
- The key visual is the end user's identification figure. He recognizes himself in it.

2. The surface

- Horizontal banners guide our end user to the right painting tools for his/her respective surface (smooth, rough, coarse).
- Live sample of surface pattern and the corresponding roller gives him/her a certainty at choosing the tool.
- The end user is properly advised - without further advice needs.

3. The quality

- Better-Best Icons guide the end user to right choice of a product quality.
- The arrangement of different qualities follows the usual HPP, MPP, OPP direction from top to bottom.

The modules "Painting walls and facades"

Painting walls

The end user knows exactly what he is up to: painting walls. The head panel leads him to the right shelf.

Immediately in the right segment

Based on the surface & better-best icons on the displays, the customer can easily find the tool he needs - in the quality he wants.

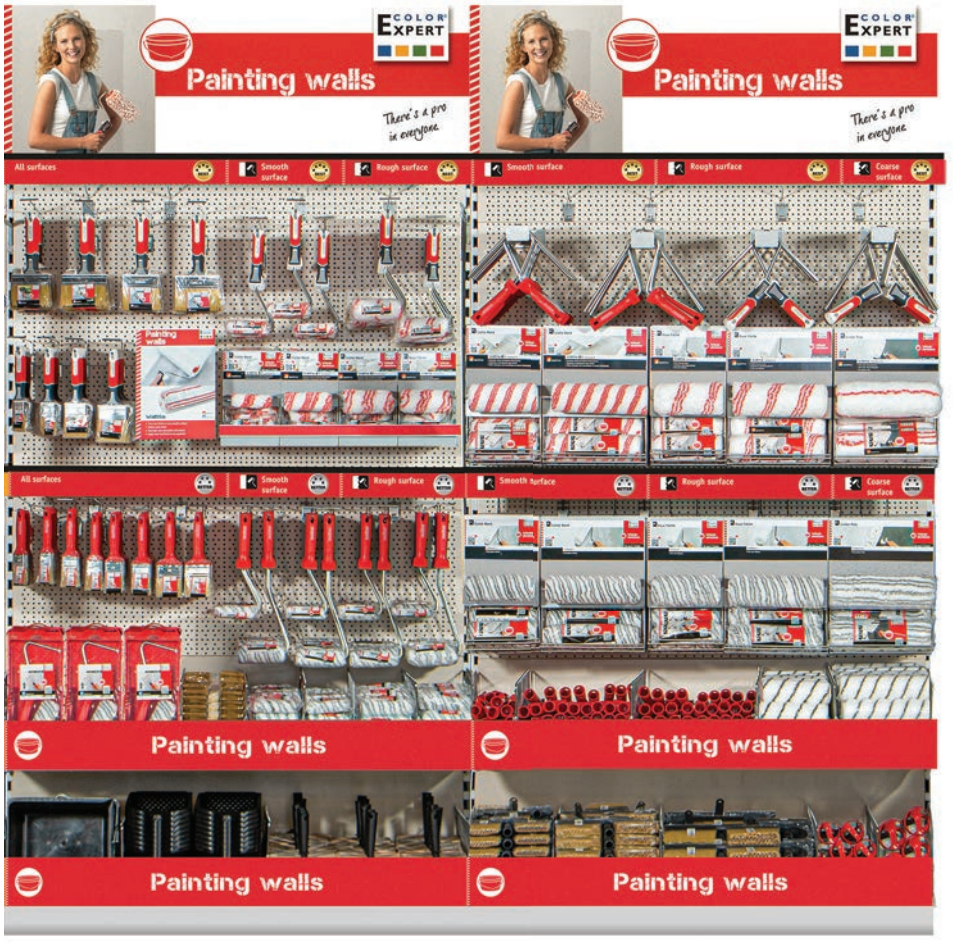

Easy choice

Which roller to use on which surface? With the horizontal banner, the end user will be properly guided to the right painting tools according to his respective surface (smooth, rough, coarse). He will get important information to make the right decisions when buying. Samples of Surface patterns and roller samples help the choice of the optimal tool.

Properly sorted. Optimal guided.

The different tools in the field "Painting walls" are in the three modules clearly sorted: from brushes and rollers to handles trays. Surface patterns on the baskets make the choice of rollers easier. Live samples of rollers, placed in front of the rolle allows customers to touch & feel the product before buying it.

The module "Varnishing"

Varnishing

Knowing where: Thanks to our colour-coding system, the end user knows immediately where to find the tool for her/his varnishing job.

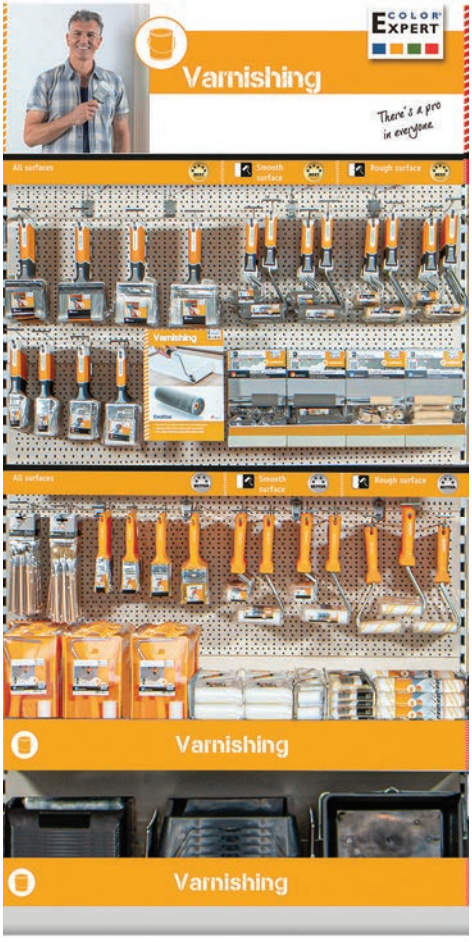

Immediately in the right segment

Smooth or rough surface? And what quality? Using the information about different surface and the Better-Best icons on the panels, end customer can easily find the proper tool he needs.

Simple solution: the 2 in 1 principle

The end user wants simple solutions. COLOR EXPERT offers it: with universal tools that are just as suitable for solvent-based paints as for water-based paints. Will this roller be working with my paint? Can I use this paint brush again even though I don´t know anymore which paint I bought it for? End customer neither wants to nor has to deal with such questions - thanks to our 2 in 1 concept from COLOR EXPERT.

The highlights

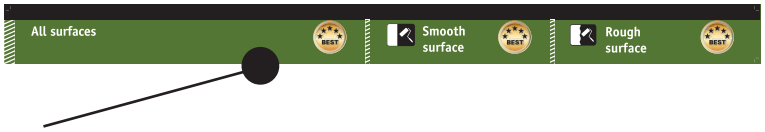

Great surface results thanks to our unique products UniStar and EvoStar: The vertical divider draws the customer's attention to special products at POS: End customer is encouraged to choose the high-quality products.

The module "Wood staining"

Wood Staining

Looking for a tool for wood preserving? The head display confirms by glance to your customer that the customer is in the right spot.

Smooth or profiled wood?

Woodstain tools for different types of wood, each in better and best quality. Information on the panels immediately give the answers.

The highlights

The WoodStar is a multiple award-winning woodstain brush. The narrow vertical divider draws the customer's attention to top product at POS - without taking up space in the aisle.

The modules "Sanding" and "Wallpapering"

A module for every work step

Sanding or wallpapering: The header panels show your customer in which module they will find the corresponding tool.

The highlights

The best way to present the top products for the work steps is via vertical dividers. Eye-catchers that catch the eye without getting in the way.

Immediately in the right segment

The panels separate the different product areas. Tools for the levelling step are shown separately.

The modules „Masking and covering”

A module for every work step

One module for fleece and foils, one module for adhesive tapes. Head panels offer the best orientation.

Immediately in the right segment

The banners in the shelves ensure horizontal orientation and separate the wide assortment of whole masking into the different product groups.

Plastering | Painting

Quickly informed, certainly decide

Which surface? Inside or outside? For days or weeks? With a help of our navigator system on the vertical bannnner, your customer can find out quickly and easily which masking product is the best suitable for his planned application.

Xpert icons

Showing what you can do: Xpert icons

Ergonomically optimized handling, perfect surface results, fast work, sustainable product - our "Xpert icons" enable the end user to constantly check what differentiates various products.

XpertErgo

XpertErgo stands for perfect handling. The ergonomic shape of the tool is optimally adapted to the user. He can work gently to his hands and without getting tired soon.

XpertSpeed

XpertSpeed stands for high working speed. Such tools enable the user to work quickly and easily.

XpertFinish

XpertFinish stands for a perfect working result. Tools with this icon enable an excellent surface finish.

XpertPlanet

XpertPlanet stands for sustainable products. For example, we use wood only from sustainable forest industry.

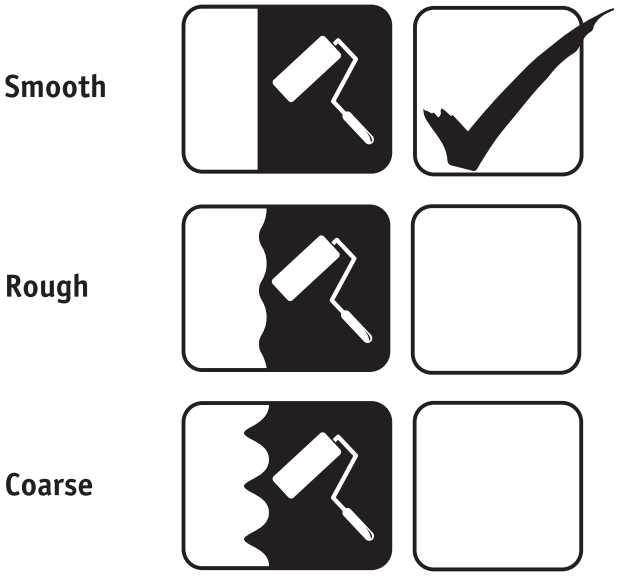

Surface icons

The choice of the tool became easier

Not all rollers are the same, not all brushes are the same - and the choice is huge. The structure of the substrate plays a decisive role in the selection of the ideal tool. With our substrate icons, we make it easy for the end user to find the right product.
Is the substrate smooth, rough or coarse? That's all your customer needs to know. They simply follow the surface icons at the POS. Then he always has the perfect tool in his hand. And a perfect result.

Smooth, rough or coarse

The surface structure is decisive for choosing the right tool:
smooth, rough, coarse - the substrate icons provide orientation.

Better-Best-Icons

Consistently sorted: We present our range in all areas according to product quality.
At the top you will find the highest quality and price class (HPP), below it the middle class (MPP) and at the bottom the entry-level segment (OPP).

Four-star product in silver

The product range segments with products from the medium quality and price segment are labelled with silver Better icons at the POS.

Five-star product in gold

Golden Best icons on the POS panels show your customers: Here you will find products for the highest demands.

Application tips

XpertTIPS

COLOR EXPERT passes on its expertise in professional painting tools to private users - also online: QR codes can be found at the POS and on the products, which lead you and your customers to valuable XpertTIPS from COLOR EXPERT. Helpful application tips that make work easier and improve results.

Masking Fastening

Cover paper with masking tape
